

# Kong Foam Machine

## Disclosure Agreement

**WARNING:** Failure to follow all safety rules and Instructions listed below may result in serious injury to yourself or other participants of this effect.

Use only as directed. Plug electrical cord into a well grounded 110 VAC 20a power supply. It is highly recommended that you use a GFI (Ground fault Interrupter) in order to use this device.

You should inspect all parts of this machine before operation. Bolts may need to be tightened after several uses.

When using the machine, keep hands and loose clothing away from the air intake at the rear of the machine, and the air output at the front.

When mounting the machine, use approved supporting structures. The Kong foam machine comes with (2) D-rings attached able to support up to 150 lbs.

This is a high foam output machine capable of filling large areas in a short amount of time. As a rule, you should not blow foam over the head of the smallest participant.

It is highly advisable to use a soft barrier to contain the foam, as visibility is reduced with high levels of foam.

Please sign and return the following agreement:

I have read and understand the proceeding notice and will adhere to the standards stated above. I understand that Foam dudes shall not be liable for any loss or damage, direct, consequential or incidental arising out of the use or inability to use this product. Buyer agrees that if the product proves to be defective, foam dudes only obligation shall be to repair or replace the product at foam dudes discretion.
